VoIP Gateway market2. Ubigate in this market3. iBG product range4. iBG installation5. iBG configurations6. iBG programming7. iBG in DR mode

Detail of Course Content

Within the Prospectus there is an overview of the material to be covered, to get the most from this course it is strongly recommended that the attendee has had experience with similar products and a good understanding of Networks in general. Whilst A CCNA qualification is not a precondition to attend the training it is a good indication to the knowledge level expected.

Ubigate Install & Commissioning (iBG)

The iBG course is designed for VoIP Gateway install, commissioning and maintenance engineering staff.

It is expected that attendees have an excellent working knowledge of VoIP Gateways. And / or an industry standard certification such as a CCNA. It is not the intention of this course to introduce VoIP to the attendees. All attendees should be fully conversant with PBX and VoIP Gateway technologies. It is also expected that attendees are conversant with Command Line Interface programming methods (CLI).

You will learn:

- iBG product overview and hardware structures
- iBG mini-module overview and usage
- iBG architecture
 - ⇒ VoIP
 - ⇒ Security
 - ⇒ Router
 - ⇒ TDM and IP Interfaces
- iBG and SIP / H.323
 - ⇒ Survivability
 - ⇒ Voice Quality (VQM)
 - ⇒ Voice Gateway
- iBG and Security
 - ⇒ Firewall
 - ⇒ VPN
- iBG Router
 - ⇒ xDLS
 - ⇒ Serial
 - ⇒ Fibre
 - ⇒ IPV6
 - ⇒ MPLS
- iBG trouble shooting
- General VoIP trouble shooting
- iBG Command Line Interface for programming (CLI)
- iBG CLI for trouble shooting
