

StorAssure Personal Edition

Continuous Data Protection for Windows Clients

Features

Easy-to-use configuration wizards make data protection fast and simple

Immediately saves file changes to Snap Servers or any attached storage device

Optimized for laptop data protection with offline file logging and battery saving features

Continuously runs in the background, saving files without user interruption

Save one or many versions of a file for flexible file recovery options

We buy insurance for our cars, our homes, our health, but what about insurance for our data? If your laptop was stolen or lost, do you have immediate access to all of your important files? If a virus corrupted all of the files on your desktop, do you have a clean copy of your information saved? Could you recover if some or all of your valuable business and personal data was lost? These are important considerations when deciding whether to back up client systems, especially in small or remote offices where users may provide their own IT support. Often, the idea of backing up these systems never becomes a consideration until a disaster occurs, and data is already lost. If a backup plan is in place, it may rely on manual backups, which are often forgotten or only take place on rare occasions. The end result is the same: valuable data is at risk when these computers aren't protected.

StorAssure Personal Edition by Adaptec is an easy-to-use, robust solution for automatically and continuously protecting valuable information on desktop and laptop systems. StorAssure can back up data to any network mounted drive, which, when combined with award-winning Snap Server by Adaptec, provides an ideal data protection solution for small and medium businesses.

Reliable, Always-On Data Protection

StorAssure Personal Edition delivers always-on insurance for the file data on your desktop and laptop computers. Once StorAssure is installed, the software will start saving all your files. Any file that you work on is backed up automatically, regardless of what program you are using to create or edit it. There is nothing else to do or remember for your files to be kept safe and secure.

StorAssure provides flexible configuration wizards that make data protection fast and simple. Specify the types of files to back up by applications, selection of group types (such as graphic files or audio files), or create your own include/exclude list. StorAssure also supports saving multiple versions of changed files, providing even greater protection against file corruption or deletion. Best of all, StorAssure does this in the background while you work, without interruption!

Fast Data Recovery

If you ever lose data on your primary system, StorAssure guides you through the process of recovering your files, restoring your data quickly and easily. Whether files are lost due to hardware failure, corrupted files from a virus or worm, or even accidental file erasure, StorAssure can restore your files.

Instant Data Access

When your data is stored on a network attached Snap Server, your files are always accessible, even if your primary system is lost. There's no need to wait for new hardware or recovery software to be installed, since full copies of your files are just a few clicks away.

Try It Today!

StorAssure comes with a fully functional 45-day free trial so that you can try it for yourself and see how easy it is to use. At any time during the trial, you can purchase and install a software license key to convert to a fully licensed copy. At the end of the trial, StorAssure will continue to track and log changes to your files, but will not back them up, to allow you extra time to make your purchasing decision.

StorAssure Personal Edition Specifications

CPU

Pentium or better, also supports dual CPU systems

Windows

98/Me/NT/2000/XP/2003

RAM

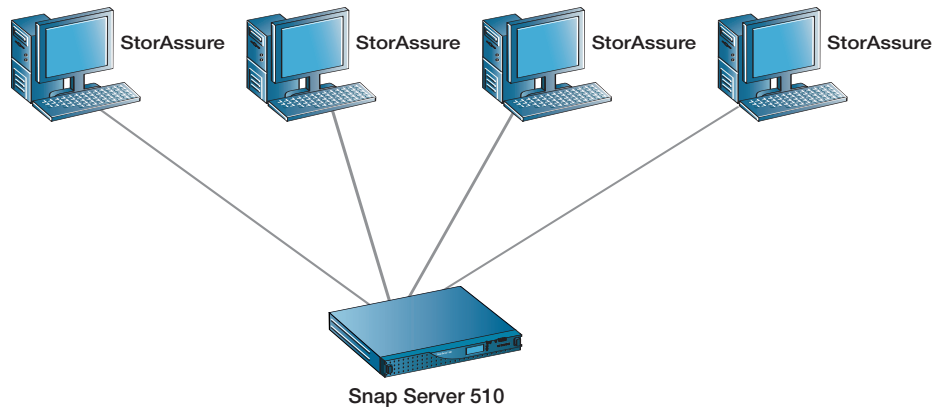

32MB, 64MB recommended
