

ACTi Training Day

IP Training

Mayflex and ACTi are working together to bring you an introduction to ACTi and the chance to become an ACTi accredited partner.

ACTi develop, integrate and market complete end-to-end solutions in the IP surveillance market. In addition to offering IP surveillance hardware such as IP cameras and video servers, all ACTi products are bundled with NVR management software.

The ACTi Training Day is in two sessions:

Introduction Seminar

Morning Session - This free seminar will give you an overview of who ACTi are and what products are on offer.

ACTi Certified Programme (ACE)

Afternoon Session - Become an ACTi certified partner with the ACE training course

- Find out how to sell against your competitors
- Learn how to sell IP to your end users, ensuring they truly understand the benefits and how IP can give them the best quality and scalability

You are welcome to come to either just the morning session to get an overview of ACTi, or the whole day, which will result in you being a certified ACTi partner.
