

CCTV Over IP Networks

IP Training

Make the move from Analogue to IP with this simple and informative training seminar.

The global demand for conventional CCTV systems is showing a downward trend with the escalating demand for IP-based CCTV surveillance. The balance of the CCTV market is changing rapidly in favour of IP. Global manufacturers are now focusing all their efforts on IP rather than analogue, so it's becoming more important than ever that integrators understand the benefits of IP and how to install it.

For anyone who has very little or no experience of IP, but knows about Analogue CCTV, this is the perfect introduction.

The course will cover the following elements:

- Introduction to data networks
- Structured cabling and installation
- Switches and routers
- Introduction to IP networking and addressing
- Troubleshooting

All the courses are being run by Mayflex in conjunction with CNet Training at Mayflex's HQ in Birmingham on the following dates:

30th March 2010

29th April 2010

26th May 2010

10th June 2010

9th September 2010

7th October 2010

4th November 2010

2nd December 2010

Mayflex also has a demonstration facility, so for those who are interested in seeing working examples of products, there is an option to combine your visit with a tour of M-Tech, our demo room (subject to availability).

To book your place, please fill out the fax back form overleaf, call our admin team on 0121 326 2743 or email admin@mayflex.com.
